

# ALPACA PENS

Dryco Manufacturing is pleased to introduce our new folding livestock panel. This versatile panel is 4' x 10' when fully extended. For those times that a 10' x 10' catch pen is just too large, this panel can take your work area down to a size as small as 4' x 4' and then easily be pulled out to a larger size. When 3 of the folding panels are hooked together, they make a 9' diameter round pen or 4 will make a 12' diameter pen. This versatile panel is a must to have on the trailer and in the barn as it folds flat to a size of 2' x 4' x 5" deep, and is small enough to ship UPS.
